**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 5/28/2008 has been entered.

***Allowable Subject Matter***

Claims 1-18 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

As to claim 1, the prior art of record, taken alone or in combination, fails to disclose or render obvious a method for analyzing properties of one or more species that are labeled with fluorophores, said method comprising the steps of: using a detector to detect a plurality of photons that are emitted in a photon stream from a species that is labeled with a fluorophore located in a detection volume wherein each of said photons arrives at said detector at an arrival time; and calculating properties of said species that are located in said detection volume based on a relationship between said photon pair intervals and said measure of intervening photons, in combination with the rest of the limitations of the claim.

Claims 2- 8 and 17 are allowed by the virtue of dependency on the allowed claim 1.

As to claim 9, the prior art of record, taken alone or in combination, fails to disclose or render obvious a method for analyzing properties of one or more species that are labeled with fluorophores and that are located within a detection volume where a detector is used to detect a plurality of photons that are emitted as part of a photon stream from said species, the improvement comprising: determining the time when said photons in said plurality of photons arrive at said detector to provide an arrival time for each of said photons; and calculating properties of said one or more species that are located in said detection volume based on a relationship between said photon pair intervals and said measure of intervening photons, in combination with the rest of the limitations of the claim.

Claims 10-16 and 18 are allowed by the virtue of dependency on the allowed claim 9.
